NREL Exhibit Comes to the Louisville Library **Visitors Will See Examples of Renewable Energy & Energy Efficiency Technologies and Applications**

LOUISVILLE, CO – July 24, 2014 – During the month of August, the Louisville Public Library will host a visiting exhibit from the National Renewable Energy Laboratory (NREL). From fundamental science and energy analysis to validating new products for the commercial market, NREL researchers are dedicated to transforming the way the world uses energy. The exhibit supports STEM (Science, Technology, Engineering and Math) education and features examples of renewable energy and energy efficiency technologies and applications. The exhibit also explores creative answers to today's energy challenges and helps with a better understanding of renewable energy and NREL's cutting-edge research.

About STEM Education Opportunities at NREL

NREL and its managing partner, the Alliance for Sustainable Energy, are committed to contributing to local and regional economic development and bringing science and technology education to the community. For information on STEM education opportunities at NREL, visit http://www.nrel.gov/education_center or call 303-384-6565.
